

Kitchen Faucet With Pull-Out Sprayer 6928-PU-8035

INTRODUCTION:

Water is a necessity of life, and the liquid containers such as teapots, watering cans and milk bottles play important roles in each chapter of human civilization. Chapter faucets combine the concept of western and eastern cultures with modern design, creating simple and elegant products herald for a brand-new era of water containers. Powder coating covers provide various color choices for the users which would fit the interactive requirements of new generation. The stainless steel spout combines with charming body and bright finish and sprayer brings vibrant atmosphere for kitchen space. Kitchen faucet is equipped with freely swivel spout which could be used for single or double sinks and the pull-out sprayer head increases the conveniences of washing and cleaning. In addition, our design team develops an optional ceramic filter into the inlet of faucet for breaking down water molecule and increasing the detergency.

DESCRIPTION:

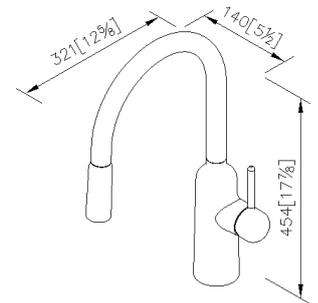

- 1.Pull-out sprayer head is equipped with a quick control button, which can switch between normal and ring spraying modes.
- 2.Pull-out sprayer control button has past the lifespan test with 50,000 times.
- 3.Sprayer hose can be extended to about 30cm for convenient operation. After operation, it will automatically revert back to the original position.
